**Festival Scope Pro is the online platform allowing programming of selected festivals around the world to be viewed online on demand. Film professionals be able to watch films, discover new talent, contact rights holders and directors...**

## **Festival Scope (www.festivalscope.com)**

**Festival Scope is a B2C platform for film lovers worldwide.**

**In partnership with the most prestigious international film festivals, Festival Scope presents a selection of films, very often right after their world premieres at the Festival! By making these titles available for very few days following their premiere, Festival Scope aims not only to give film lovers a glimpse of upcoming releases, but also to promote and help these films reach their audience. Festival Scope Pro is a B2B platform for film professionals.**

Festival Scope Pro aims to strengthen the ties among film productions, sales and distribution agencies, and national institutes all around the world, with a focus on Europe. The main goals are to promote independent cinema and to trigger the revenues for the rights holders of the films. Films are available on a highly secured platform with attention to service throughout all the process (from the coding of the file to the promotion of the film).

Festival Scope Pro is the online platform for film professionals only, allowing programming of selected festivals around the world to be viewed online on demand.

It is an allround tool to access the full potential of the international festival circuit.

It is a platform for watching films, discovering new talent, contacting rights holders and directors and viewing exclusive content. Content includes feature films & documentaries, shorts, works in progress, as well as information on projects presented at co-production markets.
